Öresund – the Sound between Sweden and Denmark

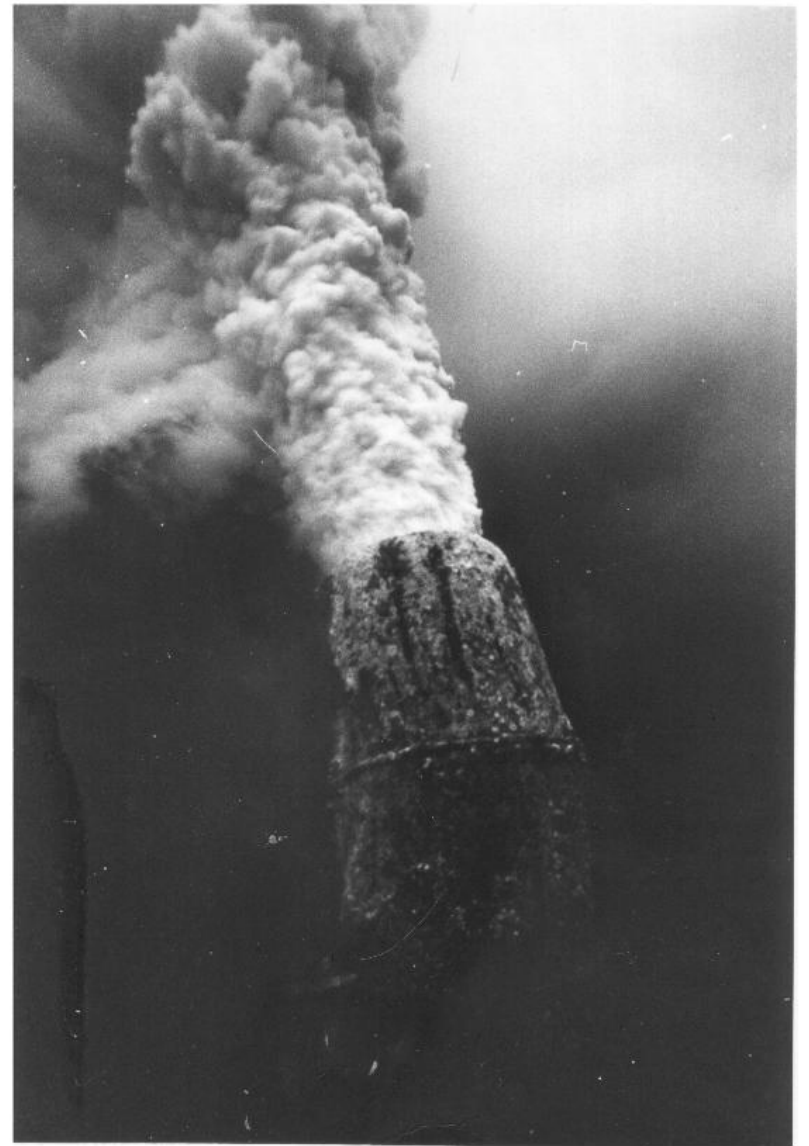

Richness of species

”- The fight for a clean Sound”

Expansion of Malmö Hamn.

Gypsum emissions in Oresound.

Fishing in Oresound

- Trawling prohibited since 1932.
- Only small fishing vessels.
- Most boats are for anglers.
- Most herring and cod.
- Line fisheries and gillnet.

The cod in Oresound – a good example.

- A local stock.
- Both small and large individuals
- A good age distribution.

Peter Göransson ©

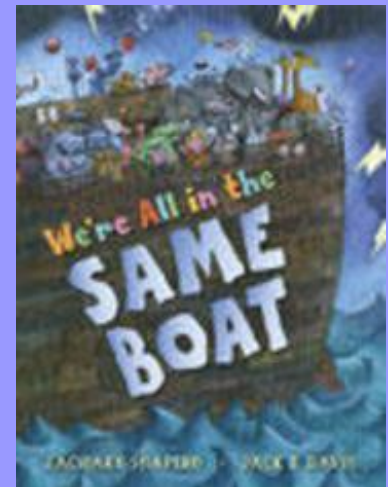

The future of the cod?

A local management for the cod – a project in Oresound

A limited number of fishermen who owns the right to fish in a limited area.

- The fish they decide not to catch today will get a chance to increase the stocks in the future.
- Prohibited for outside fishermen fishing the waters.

An environmental evaluation of the fishery!

- Necessary!
- All fishing!
- In all areas!
- Start today!

” There’s enough on this planet for everyone’s need, but not for everyone’s greed.”

Mahatma Gandhi

Thanks!
