

## Energy Efficiency in Fisheries

With global warming and high fuel prices the topic of fuel efficiency has become important for future environmentally and economically sustainable fisheries. The topic is complex and involves a wide range of issues from stock management to economic subsidies. We would like to invite managers, stakeholders, researchers, politicians, and other interested to a seminar on energy efficiency and fuel tax concessions in fisheries. The seminar is held in association with the Nordic Council of Ministers and provides an opportunity to discuss the topic in a Nordic forum.

Wednesday 27 November 2013, 9-12

SLU, Stora konferensrummet, Turistgatan 5, Lysekil

Registration by 22/11: [staffan.waldo@slu.se](mailto:staffan.waldo@slu.se)
